Fabric Roman Shade Installation Instructions

Overview

- ★ Please take a moment to review the following installation guide.
- ★ Please leave shade in folded open position for ease of installation.
- ★ Be sure to keep all components and packaging until shade is fully installed.

Recommended Tools

- Tape Measure
- Pencil
- Screwdriver
- Power drill with an 1/8" drill bit

Verify Components

Ensure that you have received each of the following components needed for proper installation :

Hardware includes	C-brackets	Short screws	Long screws
24" to 44"	2pcs	2pcs	4pcs
48"	3pcs	2pcs	6pcs

1. Choose shade position (1-Inside Mount, 2-Outside Mount)

2. Mark the C-bracket

For easy installation and proper shade operation, please make sure all the C-brackets are in alignment.

Option 1 : Inside Mount

Position the shade where you want it to hang in the window, with the front of the shade facing into the room. Center the shade inside the window frame at the required depth. Please ensure that the brackets (excluding the center bracket) are maximum 1/2"(12.7mm) away from the end of the headrail.

Option 2 : Outside Mount

Position the shade where you want it to hang on the wall above the window opening. Making sure it is centered. Mark lines where the ends of the headrail are.

3. Attach the C-bracket

Attach the C-brackets with the long screws in the wall (for outside mount) or window frame (for inside mount) that was marked.

Option 1 : Outside Mount

Option 2 : Inside Mount

For shades less than 48" wide, two brackets are needed.

For 48" wide shades, three brackets are needed. One on each side and one in the center.

4. Mount the Headrail

Clip the shade into the C-brackets, and make sure the distance between the C-bracket and the edge of the headrail does not exceed 1/2" (12.7mm). Fix the headrail on C-brackets with the short screws. The center bracket on the 48" shade is not screwed into the headrail.

Operating your installed shade

Pull gently on the handle in the middle of the roller shade at the back to lock the roman shade in the desired position. To raise the shade, pull gently down on the handle a short distance to unlock the shade and the roman shade will raise automatically.

Adjust Your Shade

Caution: To have the spring roller too tight can cause damage to the spring system. A tension sufficient to get the fabric gently back to the fully raised position is correct. If it cannot fully open, tighten the spring tension 1-2 circles as pictured (hold the roller tube still) until the shade fully opens. Conversely, if the opening speed is too fast, the spring tension should be loosened in the opposite direction (hold the roller tube still).
