### ASSEMBLY INSTRUCTION

**Note:** Bed can be assembled by one person rather easily, but if two people are available it is a bit easier and the operation will require less preparation. The instructions are written assuming one person is assembling the bed.

- I. Place the headboard (A) upright in the position you wish the bed to be in when fully assembled. The headboard bedfast hardware should be facing the inside, toward the mattress.

The siderails (C) are not handed parts so either rail will work on the right or left side. While holding the headboard (A) up, place the siderail hooks into the slots in the post of the headboard. If necessary, using a thick magazine or book to protect the siderail, hammer the hook-rail with a mallet or hammer until tight. Repeat the procedure with the other rail. The headboard (A) will now stand on its own with the rails supporting it.

Insert the siderail hooks into the slots in the footboard (B) and use the method described above.

2. Lay the bottom panel (D) in between the side rails (C)
