

INDUSTRIAL PLANK SHELF 48" INSTRUCTIONS

PARTS INCLUDED

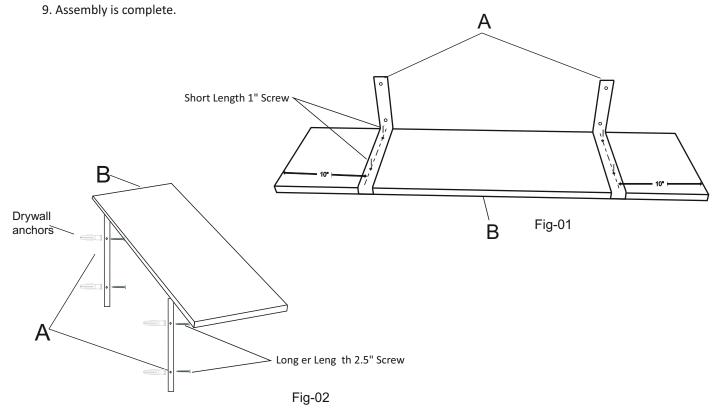

A [2] BRACKETS B [1] SHELF

NO. ITEM DESCRIPTION QTY. 1 2.5" Screw 4 PCS 2 1" Screw 4 PCS 3 Anchor 4 PCS

ASSEMBLY INSTRUCTIONS

Professional installation recommended

- 1. Carefully unpack the contents of the carton
- 2. Place the shelf on a flat surface and measure the distance between the pre-drilled pilot holes on underside of shelf. This distance will help determine spacing for shelf's brackets on the wall.
- 3. Place one bracket at desired height on the wall, ensuring straightness.
- 4. Mark the centers of the bracket holes onto the wall with a pencil.
- 5. Repeat steps 3 & 4 with the second bracket, spaced at the distance to first bracket as measured previously.
- 6. Insert drywall anchors into wall at marked places (gently tapping in until flush with wall). Place both brackets in position on the wall over the inserted anchors and screw in the longer length (2.5" Inch) screws with a Phillips screwdriver, pressing firmly to prevent anchor from rotating. Tighten screws until resistance is felt; this will fully expand the anchor.
- 7. Position the shelf on top of the brackets. The back of the shelf should be flush against the wall.
- 8. Using a Phillips screwdriver, affix the shelf to the brackets with the shorter (1" Inch) screws provided.

CARE INSTRUCTIONS

- 1. Clean periodically by wiping the shelf with a dry cloth.
- 2. Do not use abrasive cleaners, chemical cleaners or metal polishes

IMPORTANT SAFETY INSTRUCTIONS

- 1. Professional installation recommended
- 2. Do not place heavy objects on the shelf
- 3. Never sit on, stand on or apply heavy pressure to the shelf
- 4. Recommended maximum loading weight is 48 lbs.
